

Erfan Golpour

I am a fast and self-motivated learner with great passion for Computer Science and I am looking forward to shaping my professional life around machine learning and artificial intelligence.

I have high academic aspirations, and have always shown an outstanding performance at school. Happy to learn, and more than happy to share what I know.

Experiences

2018

● Python Certification

Took a 60-hour course in Programming with Python at Tehran Institute of Technology (graduated with 100/100 score).

2018

● Full Stack Web Developer Course

Took a 67-hour course in "Fullstack Web Developer" online at Udemy.

2018 - Now

● Github Community

Joined GitHub to learn and share my knowledge with others.
Created a personalized messenger with multiple encryption layers and recreated a few famous games like Minesweeper and shared them with the community.

2017 - 2019

● Freelancing

Started to do small projects on a freelance basis. As a few examples, I can mention Web Design and Development for a few elementary schools in my home city, and volunteering in a project run by the Ministry of Education of Tehran whose objective was to come up with the best design for an online education platform.

2017

● Remote Home Monitoring

Participated in a "Remote Home Monitoring System Design" workshop.

2016

● Web Design Contest

Won the first prize in a district-level Web Design Contest in my home city.

2016

● Robotic Championship League

Participated in a district-level Robotic Championship League, and we could manage to enter the regional competition. This experience helped me to improve my teamwork and problem solving skills.

2015

● First Programming Experience

Built an electronic welcome board. The LCD screen was powered by AVR microcontrollers, and my role in this project was to program the integrated circuit with C++ in design phase and do the soldering of the circuit in implementation phase. This volunteer experience was valuable to me because it was my first practical experience of using programming languages in real life cases.

2012 - 2015

● Volunteering Activities

Since 2012, I have faithfully attended numerous art contests such as painting, blogging and story writing at district and regional level and I gained a lot of experience and new insight.
